EDUCATION

Singapore University of Technology and Design (SUTD) 2024 – 2028
BEng, Computer Science and Design, Minor in Design and Artificial Intelligence
Coursework spanning software development, AI/ML fundamentals, systems thinking and design.

NPS International School, Singapore 2020 – 2024
IB Diploma · IGCSE Certificate of Academic Excellence · International Certificate of Education (Distinction).

TECHNICAL SKILLS

Languages Python, JavaScript, TypeScript, Java, C, C++, HTML, CSS
Frameworks & Libraries React, Node.js, Express.js, Next.js, TensorFlow, NumPy, Pandas, Matplotlib, OpenCV, Vite
Tools & Platforms Git & GitHub, Figma, Vercel, Firebase, Google Cloud, AWS, Netlify, SQLite, Adobe Illustrator, Canva, Framer, Gradle
Areas AI/ML fundamentals, web app development, scripting & automation pipelines, bot development, UI design

PROJECTS

World Cup Tracker 2026
A live match tracker for the 2026 FIFA World Cup, pulling real-time scores, standings and fixtures into a clean interface that updates without a page reload.

SG MeetHalfway 2026
A web app that finds a fair meeting spot for a group by combining everyone's location with public-transit data, so the suggested venue is roughly equal travel time for each person.

Personal Portfolio Site 2026
A React site deployed on Vercel that I keep extending as I pick up new things, currently used to showcase projects and experiment with layout and animation.

MakanMates 2026
An Android app that provides fair food location recommendations for a group of friends by combining everyone's location with public-transit data, so the recommended venue is roughly equal travel time for each person.

Telegram Task Bot 2026
A Python Telegram bot that tracks tasks and deadlines and sends reminders, built to cut down the friction of staying organised across chats.

Automated Pill Dispenser 2025
Built a hardware-plus-software prototype that dispenses medication on a set schedule, pairing a physical mechanism with control logic. Built at What The Hack, SUTD.

Maritime Analytics Dashboard 2025
Designed and built a dashboard surfacing key statistics for maritime companies, turning raw operational data into views a team could act on. Built at the Maritime Hackathon, NUS.

EXPERIENCE

Part-Time Tutor, MathVision Jan 2025 – Present
Tutor physics and maths one-on-one and in small groups, helping students rebuild core concepts, sharpen problem solving and prepare for exams.

Events & Welfare Leader, Student Government (ROOT), SUTD 2025 – 2026
Plan and ran community welfare events from treasure hunts to the SUTD Student Organisation Showcase, coordinating logistics and volunteers across teams.

Treasurer, Tchoukball Club, SUTD 2025 – 2026
Manage the club's finances and budgeting, and help plan training sessions and welfare activities for members.

LEADERSHIP & ACTIVITIES

Head, Project Ancora (with Youth for Causes)
Lead a student initiative working with YFC to protect and care for stray animals.

Biodiversity Conservation Volunteer (ACCB, Siem Reap, Cambodia)
Worked with the Angkor Centre for Conservation of Biodiversity on rehabilitating and conserving endangered species.

Organising Committee, Physics Society
Ran events and a podcast and published newsletters to make physics ideas more approachable to peers.

Organising Committee, Youth Climate Action Team Singapore
Organised events and partnered with other groups to push intersectional climate action and grow youth involvement.

Workshop Facilitator, Crackerjack Convention
Facilitated a workshop at an annual convention helping young people build 21st century skills.

AWARDS & PROGRAMS

CatalystX Entrepreneurship Startathon, NTU ($200, Most Creative Idea)
Pitched a startup concept for making biofuels part of everyday life and won the prize for most creative idea.

Innovation & Entrepreneurship Programme, VinUni x SUTD (Best Idea, Runner-Up)
Designed and prototyped a trade compliance and assessment interface in Hanoi, Vietnam that placed runner-up for best idea.

STEM Exhibition (Best Exhibit, Physics)
Won Best Exhibit for a Mars themed physics project.

Singapore International Science Camp, NUS
Selected for an interdisciplinary science program with workshops in 3D printing, systems thinking, AI/ML fundamentals and robotics.
