Computer Science and Design undergraduate at SUTD (minor in Design and AI) who builds practical and elegant web and automation solutions for complex problems.

EDUCATION

Singapore University of Technology and Design, Singapore 2024 – 2028
BEng, Computer Science and Design
- Minor in Design and Artificial Intelligence, along with the Computer Science and Design major
- Coursework in software development, AI/ML fundamentals, systems thinking and design

NPS International School, Singapore 2020 – 2024
IB Diploma and IGCSE
- Completed internationally recognised curricula, IB Diploma and IGCSE
- Certificate of Academic Excellence and International Certificate of Education (Distinction)

EXPERIENCE

MathVision, Singapore Jan 2025 – Present
Part-Time Tutor
- Tutor physics and mathematics one on one and in small groups for IGCSE and higher secondary students
- Rebuild core concepts, sharpen problem solving and prepare students for international exams

Student Government (ROOT), SUTD 2025 – 2026
Events and Welfare Director
- Planned and ran welfare events ranging from treasure hunts to the SUTD Student Organisation Showcase
- Coordinated logistics, budgets and volunteers across multiple teams throughout the academic year

Tchoukball Club, SUTD 2025 – 2026
Treasurer
- Managed club finances and budgeting, and helped plan training sessions and welfare activities for members throughout the year

PROJECTS AND LEADERSHIP

World Cup Tracker 2026
- Built a live match tracker for the 2026 FIFA World Cup using React and JavaScript, pulling real time scores, standings and fixtures
- Designed the interface to refresh data in place so users follow matches without a page reload

SG MeetHalfway 2026
- Built a web app in React and Python that finds a fair meeting spot for a group using everyone's location and public transit data
- Weighted results by travel time rather than distance so the venue is equal effort for each person

MakanMates 2026
- Built an Android app that recommends fair food locations for a group of friends using everyone's location and public transit data
- Ranked nearby restaurants by combined travel time for the group, helping friends settle on a spot without lengthy back and forth

Telegram Task Bot 2026
- Building a Python based Telegram bot that tracks tasks and deadlines and sends reminders directly in chat
- Cutting the friction of switching between a task app and the chats where work actually gets assigned

Automated Pill Dispenser, What The Hack, SUTD 2025
- Built a hardware and software prototype that dispenses medication on a set schedule, pairing a physical mechanism with control logic

Maritime Analytics Dashboard, Maritime Hackathon, NUS 2025
- Built a dashboard surfacing key operating statistics for maritime companies, turning raw data into views a team could act on

Project Ancora, with Youth for Causes 2024
Head
- Served as Head of Project Ancora, a student initiative in partnership with Youth for Causes to protect and care for stray animals

Physics Society 2024
Organising Committee
- Served on the Organising Committee, running events, a podcast and newsletters to make physics ideas more approachable to peers

Crackerjack Convention 2024
Workshop Facilitator
- Served as Workshop Facilitator at Crackerjack Convention, an annual event helping young people build 21st century skills

AWARDS AND PROGRAMMES

CatalystX Entrepreneurship Startathon, NTU 2025
Most Creative Idea, $200
- Pitched a startup concept for making biofuels part of everyday life at NTU's entrepreneurship startathon

Innovation and Entrepreneurship Programme, VinUni × SUTD 2025
Best Idea, Runner-Up
- Designed and prototyped a trade compliance and assessment interface during a short exchange programme in Hanoi, Vietnam

STEM Exhibition 2024
Best Exhibit, Physics
- Won Best Exhibit in the Physics category for a Mars themed project at the STEM Exhibition

Singapore International Science Camp, NUS 2024
Selected Participant
- Selected for an interdisciplinary science programme with workshops in 3D printing, systems thinking, AI/ML fundamentals and robotics

SKILLS AND PERSONAL

Languages Python, JavaScript, TypeScript, Java, C, C++, HTML, CSS
Frameworks and Libraries React, Node.js, Express.js, Next.js, TensorFlow, NumPy, Pandas, Matplotlib, OpenCV
Tools and Platforms Git and GitHub, Figma, Firebase, Google Cloud, AWS, MySQL, SQLite, Adobe Illustrator, Framer, Gradle
Areas of Interest AI/ML fundamentals, web app development, scripting and automation pipelines, bot development, UI design
